

SERVICE LEARNING PERU

RAINFOREST,
BIRDS, AND
ECOLOGY

(9 DAYS/8 NIGHTS)

*Fields of study: biology, animal science,
forestry, and sustainable tourism*

Peru

Puerto Maldonado > Amazon Field Station

Located near Puerto Maldonado, the Amazon Field Station has breathtaking landscapes as well as incredible biodiversity. It is part of the 678,774-acre Tambopata Nature Reserve.

During the service learning experience, students will learn about the tropical rain forest and the importance of the rain forest ecosystem and conservation through hand-on learning and selected lectures.

> INKATERRA <
AUTHENTIC NATURE TRAVEL IN PERU
SINCE 1975

Inkaterra is a 100% carbon-neutral organization dedicated to sustainable tourism and sharing Peru's nature and traditions with the world. Inkaterra was established in 1975 by José Koechlin von Stein and has since been at the forefront of ecotourism and sustainable development in Peru. The Amazon Field Station is a hub for scientific research, exchange, and learning opportunities.

CEPA is committed to positively impacting climate and social sustainability and strives to be a leader in environmental sustainability within international education. As part of this commitment, we offset the carbon footprint of our company's operations and the footprint created on-site by our study abroad programs in Europe. Additionally, we go the extra mile by funding environmental projects that plant native trees for each program participant.

SERVICE LEARNING IN PERU

Day 1 >> Lima

Stay 1 night in Lima

- Flight to Lima, Peru (group airfare can be booked separately)
- Arrival at Lima Jorge Chávez Airport (LIM)
